FAST-PASS®
VISITOR MANAGEMENT

Thank you for your interest in FAST-PASS® Visitor Management Solutions by SISCO, the industry leader in Electronic Identity and Visitor Management Systems. Since 1994, we have been dedicated to developing leading-edge solutions for credentialing and tracking individuals, with an observant eye towards compliance with evolving legislation.

In today's tumultuous climate, the need for increased security could not be more important. Public, private and government sectors recognize this need and have identified visitor management as the essential front line of protection in identifying, controlling and tracking individuals gaining access to facilities. FAST-PASS® delivers world-class security using state of the art technology for this ever-changing environment. As various industries develop initiatives and regulations requiring compliance with proper identification and tracking of individuals, FAST-PASS® becomes more widely accepted as the best-in-class product which meets or exceeds these compliance requirements.

FAST-PASS® quickly became the solution of choice for hospitals, schools, government facilities, commercial buildings and more since its introduction in New York City in 2000. The system not only rapidly identifies, captures a photograph of, and logs visitors, volunteers, employees, students, contractors and vendors, but cross checks criminal, sex offender and internal watch lists, which can greatly increase your security team's ability to quickly identify and stop potential security threats from gaining access to your facility.

FAST-PASS® enjoys multiple product patents and trademarks. As the industry's true innovator, FAST-PASS® is constantly perfecting seamless integration with Access Control and refining our leverage of the latest emerging hardware such as biometric devices. While many of our competitors tout the typical 'first to market' angle in their sales efforts, FAST-PASS® has had longstanding success in the marketplace and produced a system which has been emulated, but never matched, many times.

Please read on to see why FAST-PASS® is the only Visitor Management Solution you need to explore in order to effectively secure your facility.

Thank you,
The SISCO Team

The Leading Electronic Visitor Management System Available To Schools.

Protecting Students and Faculty Since 1999

- ◉ Compliance with national initiatives requiring visitor management & background checks such as the Jessica Lunsford Act and Megan's Law.

- ◉ Provides instant visual verification of authorized parents and guardians for child pick-up

Thoroughly complies with Homeland Security Presidential Directive 12 (HSPD-12) to verify the identity of individuals gaining access to government facilities.

Fast-Pass® VMS Software - Elite, Registration, Sentry, PIV Check RTL

T E S T I F Y

"The addition of this visitor management system to our already agressive security plan illustrates our commitment to providing the safest environment possible for all who come to our facilities."

- Peter Ochinko, Director of Security, Memorial Healthcare System, Hollywood, Florida

"Fast-Pass has exceeded our expectations...it has been great for my facility...visitors feel better about their loved ones being in a safer facility."

- Ira T. Wolf, Security Manager, Aventura Hospital and Medical Center, Aventura, Florida

"I'm pleased to see Fast-Pass because it will provide an increased level of security and safety for our staff and patients...In an organization as large and complex as Tampa General Hospital, security is always important, and I applaud our Safety and Security Department for taking another step to improve upon our current systems."

- Deana Nelson, Executive Vice President, Tampa General Hospital, Tampa, Florida

"With about 42,500 sex offenders in Michigan, many of them in this region, the ability to instantly identify and prevent them from entering our school buildings creates a safer learning environment for our students…this is an effective system, used in dozens of school districts, hospitals, and government and law enforcement agencies around the country…"

- Inspector General Wilbert Van Marsh, Inspector, Detroit Public Schools

"One of the main benefits (of) this system is quick, prompt, real-time screening of volunteers against the sexual predator database, which is required by law, and against the county clerk of courts' criminal database and our own district watch list."

- Anne French, Supervisor of Volunteer Services, Broward County School District
