

FAST-PASS® CAPABILITIES

- Produces self-expiring pictured visitor or vendor badge specifying destination, as well as employee badges in seconds
- Stand-alone or networked system with other hospital facilities
- Checks with external and internal watch lists, deny entry to any unwanted visitors or vendors
- Automated alerts can be sent via e-mail, to a cell phone or PDA
- Full historical database of visitor information, speedy registration for return visitors
- Electronic audit trail with customizable reports at your fingertips
- Scalable to support future biometrics and RFID emerging technologies
- Patented Intelligent Photo Imaging Camera (IPIC) that is keyboard and/or mouse controlled
- Associated child pass identifying visiting children to parents.
- Control of visitor thresholds in restricted areas i.e. ER and Maternity Ward
- Provides Human Resource departments the ability to perform significantly more comprehensive background checks
- Multiple options for access remote control integration available

CLARIFY

FAST-PASS® offers a variety of methods to notify staff of arriving visitors, vendors, volunteers and contractors.

Notifications can be sent via e-mail or by text message to a phone or PDA device.

NOTIFY

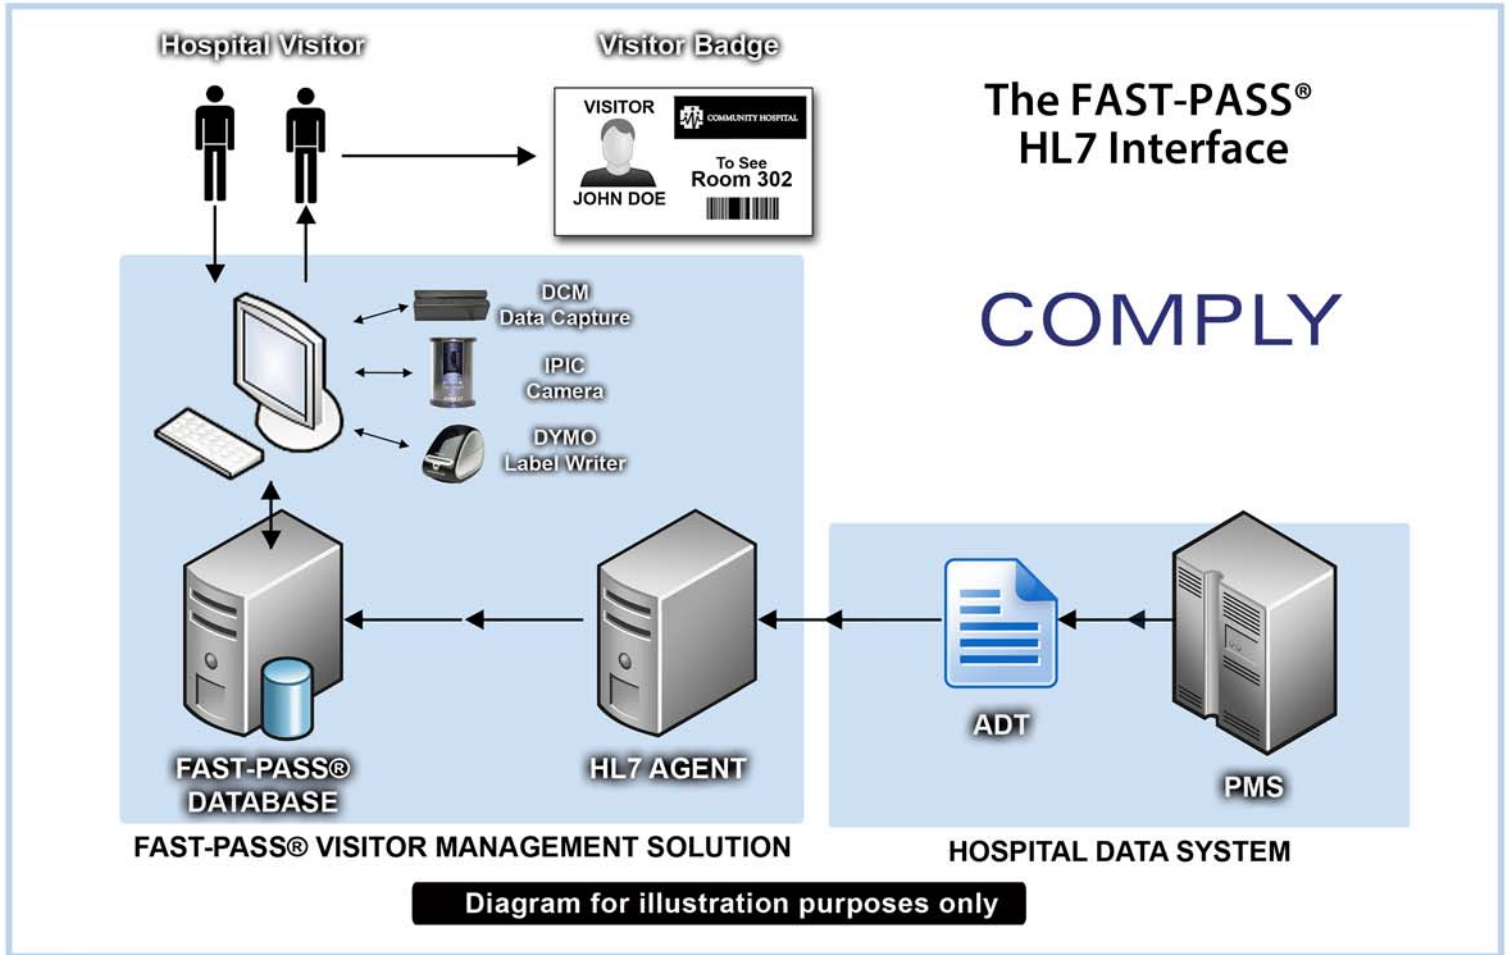

- The Joint Commission Compliant Visitor Management Solution with HL7 Interface

JUSTIFY

- Pre-approve visitor module that can be used in the Maternity Ward
- Can be configured with any number of entrances, exits and checkpoints
- Greater security for patients, nurses and doctors
- Appointment scheduling for vendors and pharmaceutical representatives

The **FAST-PASS®** HL7 Interface helps streamline your healthcare facility's visitor check in procedure by importing the patient's name, room number, and status (admitted and assigned to a bed or discharged), from the facility's Patient Management System (PMS) and populates it into the 'Person To See' drop-down list on the **FAST-PASS®** Registration page. When a visitor checks into the facility, they simply provide their ID and the name of the patient they wish to see, and the **FAST-PASS®** operator credentials the visitor then selects the patient's name from the drop-down list and prints the visitor's badge; all from a single **FAST-PASS®** screen. In facilities not utilizing the HL7 Interface feature, the **FAST-PASS®** operator must negotiate through multiple screens on multiple computer programs or computers, which increases the visitor processing time and decreases the overall visit experience.

The **FAST-PASS®** HL7 Interface does not access the hospital's PMS. Instead, **FAST-PASS®** is a "subscriber" to the PMS and receives updates when the name, room number, or status of a patient changes. When a patient is discharged, their name is automatically removed from the "Person to See" drop down list on the **FAST-PASS®** Registration page.

With its history of success in visitor management, **FAST-PASS®** is also the ideal choice for replacement of existing photo i.d. badging systems that do not offer its wide array of security features. In today's security conscious environment, the ability to properly identify staff, patients,

visitors and contract workers is crucial. With the **FAST-PASS® Photo I.D. Card System** the task has never been easier. It provides the ability to customize your

GOOD BETTER BEST

badges enabling for pictures and logos, bar codes and expiration dates to be inserted; you can differentiate between types of staff and workers,

i.e. employee, contractor or volunteer, etc. allowing, upon quick review of the badge, the ability to determine the full status of an individual. While there are many photo i.d. badging solutions on the market, none have been developed with such full attention to the issue of security as **FAST-PASS®**. Security is above all else, the primary ingredient in **FAST-PASS®**.

TESTIFY WORDS FROM SOME OF OUR HEALTHCARE CLIENTS

"The addition of this visitor management system to our already aggressive security plan illustrates our commitment to providing the safest environment possible for all who come to our facilities."

- Peter Ochinko, Director of Security, Memorial Healthcare System, Hollywood, Florida

"Fast-Pass has exceeded our expectations...it has been great for my facility...visitors feel better about their loved ones being in a safer facility."

- Ira T. Wolf, Security Manager, Aventura Hospital and Medical Center, Aventura, Florida

"I'm pleased to see Fast-Pass because it will provide an increased level of security and safety for our staff and patients...In an organization as large and complex as Tampa General Hospital, security is always important, and I applaud our Safety and Security Department for taking another step to improve upon our current systems."

- Deana Nelson, Executive Vice President, Tampa General Hospital, Tampa, Florida
