

FAST-PASS®

VISITOR MANAGEMENT

OFFICE AND COMMERCIAL BUILDING SOLUTION

FAST-PASS® is the industry leader in Electronic Identity and Visitor Management which rapidly identifies, captures and logs visitors, vendors, contractors, delivery personnel, etc. The **FAST-PASS®** Visitor Management System is the ideal solution for commercial and office buildings.

Recent events demand the need for greater security. Visitor management has been identified as an essential element in front line protection by controlling and tracking individuals gaining access to a facility or building.

FAST-PASS® acts as your virtual front desk. It can cross check Criminal, Sex Offender and internal watch lists to deny entry to any unwanted visitor. Once a visitor is cleared for entry, information from his/her drivers license is downloaded

into a database and the visitor's picture is taken and printed on a paper pass or permanent PVC badge in seconds. The photo, office or division of the building being visited are prominently displayed as well as the pass expiration and bar code for automated exit tracking.
