LTZQC0403

USB QuickCam

This PC camera is one of several cameras available with the **FAST-PASS**® system. It is full color, still capture and is used solely for capturing images of individuals to be placed on the pass and within the database.

(Model may change depending on availability.)

LTQC964

QuickCam Orbit

Logitech QuickCam Orbit AF uses a motorized lens and intelligent facetracking to keep subject in the picture. Featuring AutoFocus with Carl Zeiss optics, the QuickCam Orbit AF allows you to capture every detail and keep things sharp - even in the most extreme close-ups. **FAST-PASS**® software allows user to easily control camera positioning using a mouse or keyboard. Pan, tilt, zoom and contrast controls allow the user to efficiently capture a quality image.
