

FAST-PASS®

VISITOR MANAGEMENT

CONSTRUCTION SOLUTION

SISCO breaks ground in the Construction Industry. **FAST-PASS®** is the Industry Leader in Electronic Identity and Visitor Management Systems that rapidly identifies, captures and logs visitors, workers, employees and inspectors. The FAST-PASS system can cross check Criminal, Sex Offender, and Internal Watch lists. Once cleared, a photo badge is instantly printed designating expiration and final destination. The system is easy to use and completes the process in SECONDS without any hindrance to the flow of commerce. Additionally, the system generates an electronic audit trail of all activity that can be printed, e-mailed or stored for later retrieval for management or investigative reports. Given its ability to also produce employee identification badges, **FAST-PASS®** is the ideal choice for replacement of existing badging systems that do not offer its wide array of security features.

NOW
Green Card
Verification!

- Know who is on your site at all times
- Electronic audit trail for investigation reporting
- Electronic notification of inspectors via cell phone
- Compliant with current legislation & construction requirements
- Multiple reader locations for large job sites

FAST-PASS® has the added advantage that the barcode readers can be placed up to 100 meters from the registration station which is normally housed in the construction trailer. For larger construction sites multiple barcode readers can be utilized allowing for higher traffic flow.

FAST-PASS® CAPABILITIES

- Produces a photo badge in seconds, replacing existing employee badging system and adding extensive security benefits
- Stand-alone system or networked with other sites
- Deny entry to any unwanted visitor or subcontractors, site specific and/or all sites
- Full historical database of employee and contractor information
- Automated alerts can be sent via e-mail, to cell phone or PDA
- Automated data entry swipe or insert driver's license
- Authenticate driver's license or ID
- Scalable to support biometrics and RFID technology and emerging technologies (Green Card)
- Barcoded to scan entry and exit tracking with time and date stamped
- Provides Human Resource departments the ability to perform significantly more comprehensive background checks
- Multiple options for access control integration available
