FAST-PASS®
VISITOR MANAGEMENT

GREEN CARD READER

FAST-PASS® is the only Identity Management Solution available today with the ability to read and authenticate government issued Green Cards. **FAST-PASS**® provides its clients the ability to electronically verify the greatest range of officially issued ID's within the industry. The Green Card authentication process is unique in that the card not only electronically encodes the name and date of birth of the cardholder, but also a photo of the individual originally issued the card. This process will not only aid in providing additional security for visitors, but would also provide a discreet prescreening of potential employees.

Electronically validate Permanent Residence Cards, with the Green Card Authenticator which is ideal for employee and visitor screening.

In a matter of seconds …

- Verify if a Green Card is authentic and the cardholder is indeed the correct person

- Read the card's optical information and compare it to what is printed on the card including the photo of the person

Requires:

- USB Port
- 110/120 VAC
