FAST-PASS®
VISITOR MANAGEMENT

LAW ENFORCEMENT
SOLUTION

FAST-PASS® is the leader in electronic identity and visitor management systems for Correctional Facilities and Law Enforcement. **FAST-PASS®** rapidly captures drivers license, government ID or green card. A photo is taken and logs visitor by inmate, person visiting, clergy, attorney and/or contractor. The **FAST-PASS®** system can cross check Criminal, Sex Offender, and Internal Watch lists; notifications can be sent via email or to a wireless device. Once cleared, a photo badge is instantly printed designating expiration and final destination with a barcode for exit tracking. **FAST-PASS®** can provide visitation records for court subpoena by inmate or visitor. The system is easy to use and completes the process in SECONDS. Additionally, the system generates an electronic audit trail of all activity that can be printed, emailed or stored for later retrieval for management or investigative reports. Given its ability to also produce employee identification badges, **FAST-PASS®** is the ideal choice for replacement of existing badging systems that do not offer its wide array of security features.

- Kiosks for large volume or stand alone desk top system
- Flag and alert staff of undesirables and unauthorized visitors
- Database holds a photo record of each visitor along with ID
- Supports fingerprint, biometric readers and emerging technologies
- Pre-authorize VIP's, clergy, attorneys and contractors
- Customizable reports - daily, weekly and monthly visitor counts by inmate, attorney or contractor.

FAST-PASS® CAPABILITIES

- Automated data entry from ID - the system verifies authenticity
- Passes can be color coded and printed on adhesive paper or PVC cards
- Full historical database of visitor, vendor and contractor information
- Deny entry to any unwanted visitors either site specific and/or multiple sites
- Automated alerts or emergency instructions can be sent via e-mail, to cell phone or PDA
- Stand alone system or networked with other facilities
- Easy to use, drop down menus with step by step instructions
- Bar-coded to scan exit tracking with time and date stamped
- Internal/External Watch List Checks, Warrants, NCIC (if authorized)
- Multiple options for access control integration available
