with

VingCard[®] Vision[™] Integration^{*}

Simplify the card generation process for passenger, crew and visitor cards. Works with your Property Management System to print passenger and crew cards, generate barcodes and encode magnetic track data, using your own template-based design. Using batch or manual (single card) mode, cards can be created for all shipboard operations – cabin entry, VIP lounges, onboard purchases, etc. Integrated with the VingCard[™] Vision system, the system allows browser based administration of security access privileges for cabin rooms and all common doors.

Card Generation and Access Control Together at Last!

- Supports batch printing and encoding of all Passenger, Crew and Visitor card types
- Supports Manual printing and/or encoding of cards for Front Desk operations
- Simple browser based administration of security access privileges for cabin rooms and all common doors
- Fully integrates with the VingCard Vision 5.9 online door system for allowing door access to designated passenger areas aboard ship like the Spa, VIP Lounge, Teen Lounge, etc.
- Can be used to secure sensitive crew areas like the Bridge, Engine Room, Medical Closet, Inventory Room, etc.
- Also Supports manual card re-encoding for reusing cards or “upgraded” privileges
