FAST-PASS® ANNOUNCES INTEGRATION OF VISITOR MANAGEMENT SOLUTIN WITH C•CURE 9000 SECURITY AND EVENT MANAGEMENT SYSTEM

West Palm Beach, Florida – September 20, 2012 **– FAST-PASS®** announced today that its Visitor Management Solution is now integrated with the **Software House C•CURE 9000** Security and Event Management System.

FAST-PASS® Visitor Management Solutions, the Industry Leader in Electronic Identity and Visitor Management Systems has completed Software House's Certification Program so it is able to integrate seamlessly with the C•CURE 9000 security and event management system for a scalable, feature-rich business solution.

FAST-PASS® cross checks Criminal, Sex Offender, and Internal Watch lists. **FAST-PASS®** also has the ability to read and validate government issued credentials including TWIC in order to comply with initiatives such as HSPD-12 and FIPS 201. Even if they are not required to comply with initiatives around visitor identification, facilities nationwide have recognized a need for greater security and identified visitor management as essential front line protection in controlling and tracking individuals gaining access to facilities. **FAST-PASS®** is the largest visitor management security solution in the country. Once a visitor is cleared, a photo badge is instantly printed designating expiration and final destination. The system is easy to use and completes the process in SECONDS. Additionally, the system generates an electronic audit trail of all activity that can be printed, emailed or stored for later retrieval for management or investigative reports. **FAST-PASS®** acts as a frontline deterrent, eliminating the opportunity for undesirables to act on their intentions.

FAST-PASS® CEO Anthony Zagami says, "We are so pleased, after much research and development to have achieved seamless integration with Software House's C•CURE 9000 Security and Event Management System. This integration establishes an ideal blend of visitor management with access control."
